Industrial Air Pollution Control Systems

a wide selection of high-performance cartridge filters to fit our equipment and competitive dust collector brands.

UAS offers a variety of industrial air cleaning systems to meet virtually any application. Choose from our well-known Smog-Hog® mist and fume collectors or our complete line of dust collection systems. We also carry

Commercial Air Cleaning Systems

UAS' commercial air cleaners provide solutions for a variety of indoor air quality problems. Whether it's smoke,

bacteria, allergens or other invisible forms of pollutants, our clean air systems are perfect for smoking and non-smoking environments. Choose from the widely recognized Smokeeater® product line, as well as other concealed and odor-reducing systems.

Kitchen Emission Control Systems

UAS can help restaurants meet strict environmental standards with Smog-Hog® Kitchen Emission Systems. These electrostatic mist and fume collectors control grease, smoke and odor emitted from cooking operations. Available to fit virtually any air volume or building design, these systems help keep your facility clean and odor-free.
